ELIDI SCORE

4.17 / 7.00

Radar Profile

PM	Process Management	3.17
EM	Emotional Management	3.67
RRM	Risk & Reward Management	3.17
IAI	Information & Analytical Intelligence	4.83
SIS	Social & Interpersonal Skills	5.00
EDI	Executive Decision Intelligence	5.17

Dimension Analysis

PM Process Management

3.17 /7

Moderate process use — some structure but room to build more consistent frameworks.

EM Emotional Management

3.67 /7

Developing emotional regulation — awareness is present but consistency may vary.

RRM Risk & Reward Management

3.17 /7

Moderate risk awareness — improving scenario planning would sharpen outcomes.

IAI Information & Analytical Intelligence

4.83 /7

Solid analytical base — increasing data rigor and bias awareness will enhance quality.

SIS Social & Interpersonal Skills

5.00 / 7

Strong interpersonal decision skills — you leverage relationships and build consensus well.

EDI Executive Decision Intelligence

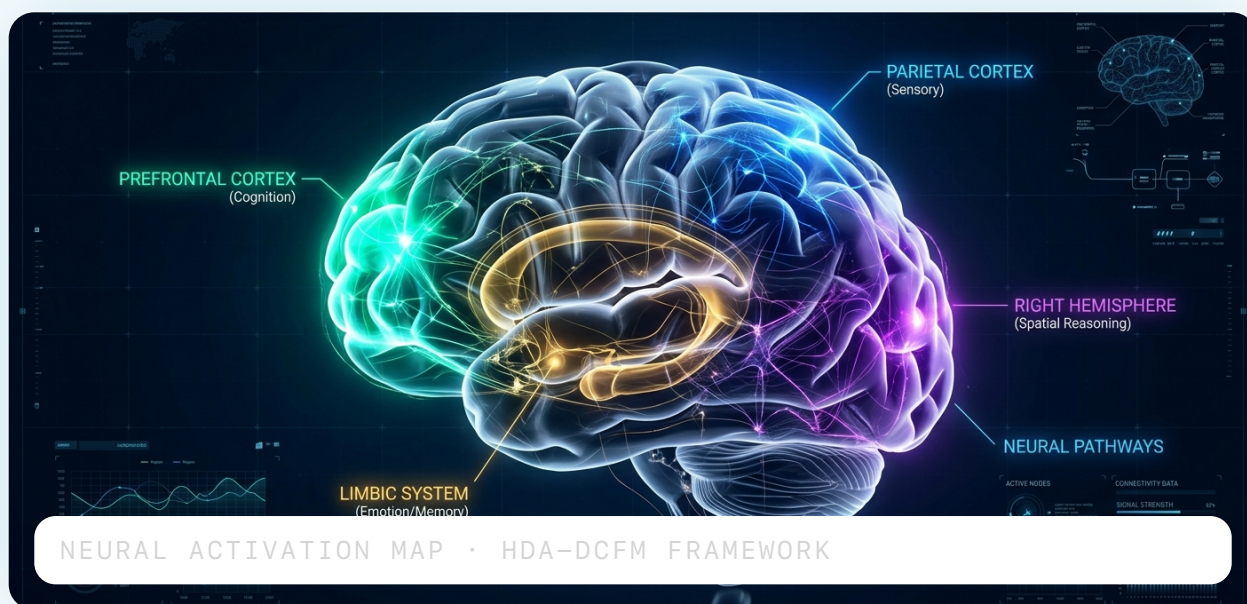

5.17 / 7

Executive-level decision intelligence — you act decisively, strategically, and with accountability.

Neural Activity Profile

BRAIN REGION ACTIVATION · BASED ON YOUR DECISION PROFILE

Prefrontal Cortex Executive Control & Planning

Moderate

53%

Moderate executive engagement. You manage structure reasonably well, but there is capacity to sharpen decision planning and forward-thinking processes.

Limbic System Emotion & Motivation

Moderate

45%

Moderate emotional engagement. You generally manage your feelings, though high-stakes situations may benefit from stronger emotional grounding techniques.

Parietal / Analytical Cortex Data Processing & Logic

Moderate

64%

Analytical pathways are moderately active. You can work with data but may sometimes rely on intuition in areas where deeper analytical scrutiny would sharpen outcomes.

Social Brain / Right Hemisphere Creativity & Interpersonal Intelligence

Moderate

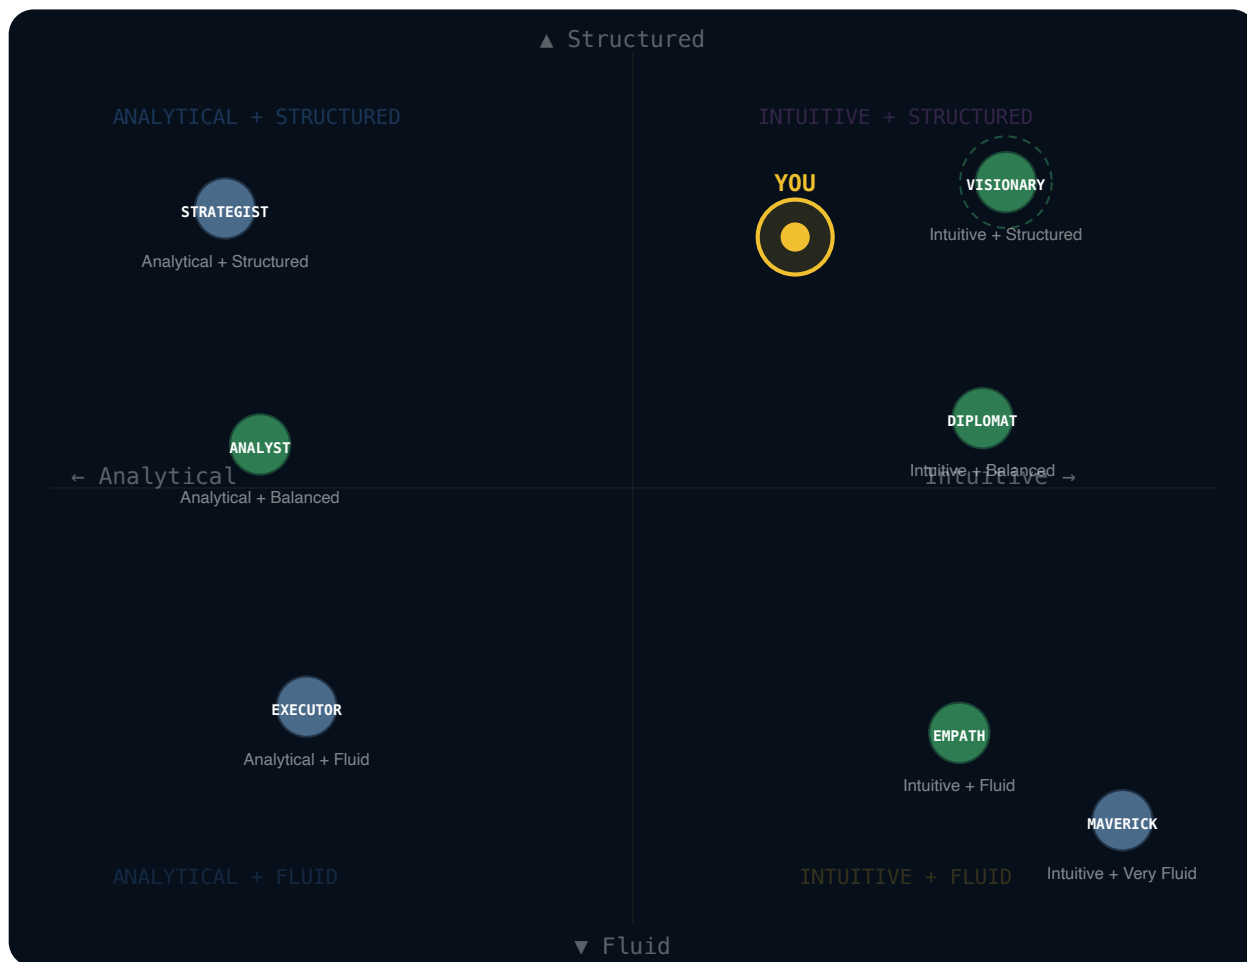

51%

Moderate social brain engagement. You navigate social dynamics adequately and show creative thinking, with room to deepen interpersonal empathy and lateral ideation.

Decision Archetype Landscape

YOUR POSITION & ARCHETYPAL ASPIRATIONS

Aspire toward

Approach with awareness

Neutral territory

You

Nearest archetype: The Visionary — Intuitive + Structured. Your decision profile places you closest to this style. Use this as a reference point, not a ceiling.

◆ Personalized Recommendations

- 1 Invest in structured decision frameworks. Tools like RACI matrices, decision logs, and pre-mortem analysis can dramatically improve process consistency.
- 2 Build a personal risk assessment toolkit. Regular scenario planning, probability estimation exercises, and defined risk thresholds will improve outcome calibration.
- 3 Practice mindfulness-based decision techniques. Developing a "pause protocol" before major decisions can reduce emotional interference by up to 40%.

- 4 Continue to monitor your Decision Intelligence scores over time. Quarterly reassessment helps track growth and identify shifting development needs.

Response Pattern Analysis

ANOMALY & ABERRATION REPORT

Acquiescence Bias

Low

23 of 36 responses (64%) were in the agreement range (5–7). A positive response tendency may inflate scores across all dimensions. Results should be interpreted with this inclination in mind.

Note: These patterns do not invalidate your results, but provide important context for interpretation. Use them to inform a more nuanced reading of your elidi Score.
